

The One Diamonds

How to determine the size of your ring

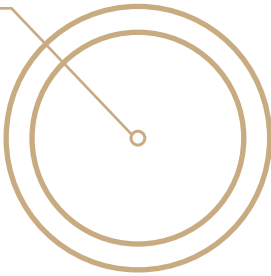

Before printing, make sure the page scale is “100 %” in the print dialog. (To open the print dialog, press CTRL + P).

Measure the bar below. Must have exactly 30 mm in length.

This guide to measuring ring size is only a reference tool.

Internal diameter

Measure current ring

1. Select a ring that will properly fit the finger of the person who will be wearing it.
2. Place the ring over the circles on the right. Match the inner edge of the ring to the circle that is closest in size. This measurement refers to the internal diameter of the ring.
3. If the ring is between two sizes, order the larger size.

Measure your finger

The size of the fingers varies according to the time of day and the weather; For best results: 1. Measure finger size on the day and when fingers are warm. (The fingers are smaller in the morning and when they are cold.) 2. Measure the finger three or four times to avoid mistakes.

Try not to use string or paper to measure finger size, as these materials can stretch or bend and result in an inaccurate measurement.

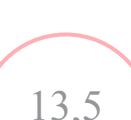

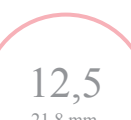

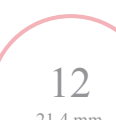

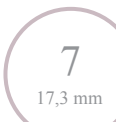

Tips to buy the ring as a surprise

Ask friends or your partner's mother if she knows the size of her finger.

Borrow a ring from your partner (from the correct finger) and use the measurements to determine the size.

Free size modification

The One Diamonds Offers free size modifications on all personalized engagement rings for the first year. Contact one of our consultants to request a free size modification.

International ring size table

Diameter (mm)	United States and Canada	Europe	UK and Australia	Singapore and Japan	Hong Kong	Switzerland
